Purdue University

CS422 Final Project

April 15, 2020

```
// Starts the program
int main() {
    printf("Hello, World!");
}
```

1 Problem Definition

The definition of the problem I will solve.

2 Motivation

Why am I doing this project?

3 Related Work

Other work that is related to this project.

4 Proposed work

What am I going to do?

5 Schedule

How/when am I going to complete this? What will be my timeline?

6 Team Members

For this project, I decided to work by myself. I made this decision so that I could complete a personal project and potentially stand out to recruiters in the future. Also, a team project during quarantine would have complicated collaboration.
